

SAMVEDI
WORLDWIDE

Nature Distilled, Life Enhanced

ABOUT US

It is my pleasure to welcome you at Samvedi Worldwide – A Global Manufacturer of Essential Oils and Natural Fragrances. Samvedi Worldwide offers a full range of quality products and is recognised as a leading manufacturer, exporter, and wholesale supplier of essential oils, absolutes, CO2 extracted oils, fragrance and perfume oils, aromatic chemicals, carrier oils, floral waters, and Indian attars. Our products are designed to meet the needs of various industries while maintaining 100% purity. Sustainability is an important aspect of our commitment to excellence. We source high-quality botanicals from around the world, ensuring all our products adhere to standards of purity, potency, and efficacy. Our oils and extracts are suitable for use in cosmetics, wellness, aromatherapy, and fragrance industries.

At Samvedi Worldwide, we aim to establish long-term partnerships with our customers. We prioritize customer satisfaction and work diligently to meet your business objectives within the expected timeframe. By choosing to work with us, you will have access to premium products and personalized services.

At Samvedi Worldwide, we believe in creating meaningful connections through innovation, quality, and trust. Founded with a vision to redefine industry standards, we have grown into a globally recognized name, delivering excellence in every endeavor. Our mission is to provide cutting-edge solutions while upholding integrity, sustainability, and customer-centric values

ESSENTIAL OIL

AJOWAN OIL

Extracted through steam distillation from the seeds of the Ajowan plant (*Carum copticum*), this oil is known for its antimicrobial, antifungal, and digestive properties. It has a strong, spicy aroma and is commonly used to relieve indigestion and reduce inflammation.

ANGELICA ROOT OIL

Steam distilled from the roots of the Angelica plant (*Angelica archangelica*), this oil is valued for its calming and grounding effects. It has anti-inflammatory, digestive, and respiratory benefits, and is often used for anxiety, detoxification, and improving circulation.

ANISE OIL

Anise oil is steam distilled from the seeds of the Anise plant (*Pimpinella anisum*), known for its sweet, licorice-like aroma. It has antiseptic, antifungal, and digestive properties and is used to alleviate indigestion, nausea, and respiratory issues.

BALCHAR OIL (JATAMANSI)

Jatamansi oil is steam distilled from the roots of the Jatamansi plant (*Nardostachys jatamansi*). Known for its calming and restorative properties, it is used to relieve stress, promote sleep, and enhance mental clarity.

BASIL/TULSI OIL

Steam distilled from the leaves of the Basil (*Ocimum basilicum*) or Holy Basil (*Ocimum sanctum*) plant, Tulsi oil has a sweet, herbaceous scent. Known for its purifying, antimicrobial, and anti-inflammatory properties, it's often used in Ayurvedic medicine to reduce stress and improve respiratory health.

BERGAMOT OIL

Extracted through cold-pressing the rinds of the Bergamot orange (*Citrus bergamia*), this refreshing citrus oil is prized for its mood-enhancing, antibacterial, and anti-inflammatory properties. It is commonly used to alleviate anxiety, depression, and skin irritations.

BLACK PEPPER OIL

Steam distilled from the dried fruits (peppercorns) of the Black Pepper plant (*Piper nigrum*), this oil has a warm, spicy scent. It is known for its stimulating, pain-relieving, and digestive properties and is often used to enhance circulation, ease muscle pain, and relieve digestive discomfort.

CAJEPUT OIL

Steam distilled from the leaves and twigs of the Cajeput tree (*Melaleuca cajuputi*), Cajeput oil has a fresh, medicinal aroma. It possesses antiseptic, analgesic, and anti-inflammatory properties, commonly used for respiratory issues, muscle aches, and skin conditions.

CALAMUS ROOT OIL

Calamus root oil is steam distilled from the rhizome of the Calamus plant (*Acorus calamus*). Known for its earthy, calming scent, it has soothing, anti-inflammatory, and anti-anxiety properties, and is often used to improve focus, ease stress, and support digestive health.

CAMPHOR OIL

Steam distilled from the wood of the Camphor tree (*Cinnamomum camphora*), Camphor oil has a cooling, invigorating effect. It is widely used for its anti-inflammatory, analgesic, and decongestant properties, helping to relieve respiratory congestion, soothe sore muscles, and reduce skin irritation.

CARDAMOM OIL

Steam distilled from the seeds of the Cardamom plant (*Elettaria cardamomum*), this warm, spicy oil has digestive, anti-inflammatory, and uplifting properties. It is commonly used to relieve indigestion, improve circulation, and reduce stress.

CARROT SEED OIL

Extracted through steam distillation from the seeds of the wild carrot plant (*Daucus carota*), this oil is known for its high levels of antioxidants. It promotes skin regeneration, reduces wrinkles, and helps with detoxification, making it popular in anti-aging skin care products.

CASSIA OIL

Cassia oil is steam distilled from the bark of the Cassia tree (*Cinnamomum cassia*), which has a similar aroma to cinnamon. It possesses strong antimicrobial, anti-inflammatory, and warming properties and is often used to improve circulation and ease digestive issues.

CEDAR LEAF OIL

Steam distilled from the leaves of the Eastern Red Cedar tree (*Juniperus virginiana*), Cedar Leaf oil has a woody, grounding aroma. It has antiseptic, astringent, and calming properties, commonly used to purify the air, reduce stress, and support skin health.

CEDARWOOD OIL

Extracted from the wood of various Cedar trees (*Cedrus* species), Cedarwood oil has a rich, woody, grounding scent. It is known for its calming, antiseptic, and anti-inflammatory properties, often used to promote relaxation, alleviate skin irritations, and reduce stress.

CELERY SEED OIL

Celery Seed oil is steam distilled from the seeds of the Celery plant (*Apium graveolens*). It has a fresh, herbal aroma and is known for its digestive, anti-inflammatory, and diuretic properties, helping to support digestion, ease muscle pain, and reduce swelling.

CHAMOMILE OIL, BLUE

Steam distilled from the flowers of the Blue Chamomile plant (*Matricaria chamomilla*), this oil is known for its calming, anti-inflammatory, and soothing properties. It is widely used for skin care, alleviating anxiety, and reducing muscle spasms.

CINNAMON BARK OIL

Cinnamon Bark oil is steam distilled from the inner bark of the Cinnamon tree (*Cinnamomum verum*). It has a warm, spicy aroma and is known for its powerful antibacterial, antifungal, and analgesic properties, often used to support immunity and alleviate pain.

CINNAMON LEAF OIL

Extracted through steam distillation from the leaves of the Cinnamon tree, Cinnamon Leaf oil has a slightly milder scent than Cinnamon Bark oil. It has antiseptic, antimicrobial, and pain-relieving properties, and is used to improve circulation and support digestive health.

CITRONELLA OIL

Citronella oil is steam distilled from the leaves and stems of the Citronella grass (*Cymbopogon nardus*). It has a fresh, citrus aroma and is best known for its ability to repel insects, as well as its antimicrobial and uplifting properties.

CLARY SAGE OIL

Steam distilled from the flowers and leaves of the Clary Sage plant (*Salvia sclarea*), Clary Sage oil has a sweet, herbaceous scent. It is renowned for its hormone-balancing, stress-relieving, and anti-inflammatory properties, often used in aromatherapy for relaxation and emotional support.

CLOVE LEAF OIL

Steam distilled from the leaves of the Clove tree, Clove Leaf oil has a slightly milder aroma than Clove Bud oil. It is used for its antibacterial, antifungal, and analgesic properties, providing relief for digestive issues and muscle pain.

CLOVE BUD OIL

Extracted through steam distillation from the flower buds of the Clove tree (*Syzygium aromaticum*), Clove Bud oil has a strong, spicy aroma. It is known for its powerful analgesic, antimicrobial, and antioxidant properties, commonly used to ease toothaches, improve circulation, and support immune health.

CORIANDER SEED OIL

Extracted from the seeds of the Coriander plant (*Coriandrum sativum*) via steam distillation, Coriander oil has a warm, spicy fragrance. It offers digestive, anti-inflammatory, and antiseptic benefits, often used to ease stomach discomfort and promote mental clarity.

CUMIN SEED OIL

Cumin Seed oil is steam distilled from the seeds of the Cumin plant (*Cuminum cyminum*). Known for its warming, earthy scent, this oil has digestive, anti-inflammatory, and pain-relieving properties, commonly used for gastrointestinal support and to relieve muscle pain.

CURRY LEAF OIL

Curry Leaf oil is steam distilled from the leaves of the Curry Tree (*Murraya koenigii*). With a rich, herbaceous aroma, it is prized for its antioxidant, anti-inflammatory, and hair-strengthening properties, supporting healthy hair growth and digestive health.

CYPRIOL OIL (NAGARMOTHA)

Cypriol oil is steam distilled from the roots of the Cypriol plant (*Cyperus scariosus*). It has a deep, earthy, and musky aroma and is known for its grounding, anti-inflammatory, and antimicrobial properties, used in skincare and relaxation.

DAVANA OIL

Davana oil is extracted from the flowering tops of the Davana plant (*Artemisia pallens*) via steam distillation. With a sweet, herbal aroma, it has calming, anti-inflammatory, and mood-enhancing properties, commonly used for emotional balance and skin care.

DILL SEED OIL

Dill Seed oil is steam distilled from the seeds of the Dill plant (*Anethum graveolens*). This oil has a mild, herbaceous aroma and is known for its digestive, carminative, and anti-inflammatory properties, often used to alleviate bloating and ease indigestion.

EUCALYPTUS OIL

Eucalyptus oil is steam distilled from the leaves of the Eucalyptus tree (*Eucalyptus globulus*). With a fresh, medicinal scent, it has antimicrobial, anti-inflammatory, and decongestant properties, frequently used to clear respiratory congestion and reduce muscle pain.

FRANKINCENSE OIL

Frankincense oil is steam distilled from the resin of the Boswellia tree (*Boswellia sacra*). It has a rich, woody aroma and is known for its grounding, anti-inflammatory, and anti-aging properties, commonly used in meditation, skincare, and respiratory support.

GERANIUM OIL

Geranium oil is extracted from the leaves and flowers of the Geranium plant (*Pelargonium graveolens*) via steam distillation. It has a sweet, floral scent and is known for its balancing, anti-inflammatory, and antimicrobial properties, often used to balance hormones and promote skin health.

GINGER GRASS OIL

Steam distilled from the fresh grass of the Ginger plant (*Zingiber zerumbet*), Ginger Grass oil has a fresh, spicy fragrance. It offers digestive, anti-inflammatory, and pain-relieving benefits, often used to soothe nausea and improve circulation.

HEDYCHIUM OIL (KAPOOR KACHRI)

Extracted from the rhizome of the Hedychium plant (*Hedychium spicatum*), this oil has a sweet, floral aroma. It is known for its calming, anti-inflammatory, and skin-healing properties, used for soothing muscle pain and supporting skin health.

JASMINE SAMBAC OIL

Jasmine Sambac oil is extracted from the flowers of the Jasmine plant (*Jasminum sambac*). It has a sweet, exotic fragrance and is prized for its aphrodisiac, skin-healing, and emotional-balancing properties.

JUNIPER BERRY OIL

Steam distilled from the berries of the Juniper tree (*Juniperus communis*), Juniper Berry oil has a fresh, woody scent. It has detoxifying, anti-inflammatory, and antibacterial properties, often used for cleansing the skin and improving circulation.

LAVENDER OIL

Lavender oil is steam distilled from the flowers of the Lavender plant (*Lavandula angustifolia*). It is widely known for its calming, antibacterial, and anti-inflammatory properties, making it ideal for stress relief, promoting sleep, and soothing skin irritations.

LEMONGRASS OIL

Lemongrass oil is extracted via steam distillation from the leaves of the Lemongrass plant (*Cymbopogon citratus*). It has a fresh, citrus aroma and is known for its antimicrobial, anti-inflammatory, and uplifting properties, commonly used to boost mood and support digestion.

MACE OIL

Mace oil is steam distilled from the spice derived from the outer coating of nutmeg seeds (*Myristica fragrans*). It has a warm, spicy scent and offers digestive, analgesic, and anti-inflammatory benefits.

NUTMEG OIL

Nutmeg oil is steam distilled from the seeds of the Nutmeg tree (*Myristica fragrans*). It has a warm, sweet aroma and is known for its stimulating, digestive, and pain-relieving properties. Nutmeg oil is steam distilled from the seeds of the Nutmeg tree (*Myristica fragrans*). It has a warm, sweet aroma and is known for its stimulating, digestive, and pain-relieving properties.

PALMAROSA OIL

Steam distilled from the leaves of the Palmarosa plant (*Cymbopogon martinii*), this oil has a sweet, floral aroma. It has balancing, hydrating, and antibacterial properties, and is widely used for skin care and emotional balance.

PATCHOULI OIL

Patchouli oil is steam distilled from the leaves of the Patchouli plant (*Pogostemon cablin*). It has an earthy, musky aroma and is known for its grounding, anti-inflammatory, and antiseptic properties, often used for skin rejuvenation and relaxation.

PEPPERMINT OIL (CITRATA)

Peppermint oil is steam distilled from the leaves of the Peppermint plant (*Mentha piperita*). It has a strong, refreshing mint scent and is widely known for its digestive, pain-relieving, and cooling properties.

PEPPERMINT OIL (PIPERITA)

Peppermint oil (Piperita) is a highly potent variety of mint, known for its cooling, invigorating effects. It is used to ease headaches, digestive discomfort, and relieve muscle pain.

ROSE OIL (RUH GULAB)

Rose oil is steam distilled from the petals of the Rose plant (*Rosa damascena*). It has a luxurious, floral scent and is known for its anti-aging, anti-inflammatory, and mood-enhancing properties, commonly used for skin rejuvenation.

SANDALWOOD OIL

Sandalwood oil is steam distilled from the heartwood of the Sandalwood tree (*Santalum album*). It has a rich, woody aroma and is used for its calming, grounding, and anti-aging properties, often used in meditation and skincare.

SPEARMINT OIL

Steam distilled from the leaves of the Spearmint plant (*Mentha spicata*), Spearmint oil has a milder, sweeter mint aroma. It has digestive, soothing, and energizing properties, often used to relieve nausea and headaches.

SUGANDH KOKILA OIL

Sugandh Kokila oil is steam distilled from the berries of the Sugandh Kokila tree (*Cinnamomum glaucescens*). It has a spicy, herbal aroma and is used for its antimicrobial, soothing, and mood-enhancing properties.

SUGANDH MANTRI OIL

Extracted from the flowers of the Sugandh Mantri plant, this oil has a floral, sweet aroma. It is used for its calming, uplifting, and purifying properties.

TURMERIC OIL

Turmeric oil is steam distilled from the roots of the Turmeric plant (*Curcuma longa*). It has a warm, earthy aroma and is known for its strong anti-inflammatory, antioxidant, and skin-healing properties.

TAGET OIL

Taget oil, also known as Marigold oil, is extracted from the flowers of the Tagetes plant. It is used for its calming, soothing, and anti-inflammatory properties, making it beneficial for skin care and relaxation.

VALERIAN OIL

Valerian oil is steam distilled from the roots of the Valerian plant (*Valeriana officinalis*). It has a deep, earthy scent and is used for its calming, sedative properties, commonly used to improve sleep quality and reduce anxiety.

VETIVER OIL (WILD-ROOH KHUS)

Extracted from wild Vetiver roots, this oil has a rich, earthy scent and is used for its soothing, grounding, and cooling properties. It is beneficial for relaxation and emotional well-being.

VETIVER OIL (CULTIVATED)

Vetiver oil is steam distilled from the roots of the Vetiver plant (*Vetiveria zizanoides*). It has a deep, earthy fragrance and is known for its grounding, calming, and anti-inflammatory properties.

HYDROSOLE

BELA WATER

Source: Extracted from the Mimosa pudica (Bela or Bael) flowers.

Properties: Bela water is known for its mild, pleasant fragrance and is believed to have cooling, anti-inflammatory, and anti-bacterial properties.

Uses: Commonly used in skincare for soothing and rejuvenating the skin. It is also used in traditional Ayurvedic medicine and as an offering in religious rituals in India.

KESAR WATER

Source: Derived from saffron (Crocus sativus) threads.

Properties: Kesar water has a subtle yet rich, aromatic fragrance and is known for its skin brightening, anti-inflammatory, and antioxidant properties.

Uses: Often used in skincare to improve skin tone, lighten dark spots, and enhance complexion. It is also used in Ayurvedic treatments and sometimes in cooking for its rich flavor.

KEWDA WATER

Source: Derived from the Pandanus odoratissimus (screw pine) flowers.

Properties: Kewda water has a pleasant, floral aroma and is known for its cooling and refreshing properties. It is also a mild antiseptic and astringent.

Uses: Often used in traditional Indian cosmetics and skincare, it is valued for its ability to rejuvenate the skin. It is also used in perfumes, and in some culinary dishes and drinks.

PANCHPUSP WATER

Source: A blend of five flowers, typically including rose, jasmine, champa, marigold, and lotus.

Properties: Panchpusp water is a fragrant hydrosol with a blend of floral notes. It is often considered to have cooling and refreshing qualities.

Uses: Mainly used in religious ceremonies, for purification, and in beauty products like toners and facial mists. It is also used in traditional Indian rituals and as an offering.

ROSE WATER

Source: Distilled from the petals of the Rosa damascena (Damask rose) or other rose species.

Properties: Rose water has soothing, anti-inflammatory, and hydrating properties. It is widely used in skincare for its ability to balance the skin's pH, reduce redness, and promote a healthy glow.

Uses: Commonly used as a facial toner, in homemade cosmetics, and as a calming agent in aromatherapy. It is also used in culinary applications, especially in Middle Eastern and Indian sweets.

INDIAN ATTARS

BELA ATTAR

Scent Profile: Floral, sweet, and slightly citrusy.

Source: Derived from the Bela flower (often associated with jasmine).

Usage: Known for its delicate and refreshing fragrance, often used to uplift the mood and as a base for feminine perfumes.

BLACK MUSK ATTAR

Scent Profile: Deep, musky, woody, smoky, and seductive, with earthy and amber undertones.

Source: Originally derived from the musk deer, but now typically synthetic or made from plant-based musks like Ambrette seeds.

Usage: Primarily used in luxury perfumes, sensual and romantic products, aromatherapy, spiritual rituals, and incense for its long-lasting, intense, and grounding properties

DEHNALUD ATTAR

Scent Profile: Deep, rich, smoky, and woody.

Source: Extracted from the rare and highly prized Agarwood (Oud).

Usage: Oud is one of the most luxurious and expensive fragrance materials. Dehnalud (Black Oud) is known for its potent and complex scent, often used in high-end perfumes and spiritual rituals.

GULAB ATTAR

Scent Profile: Soft, sweet, and floral.

Source: Distilled from the petals of the rose.

Usage: Known for its romantic and calming effects, it is one of the most sought-after floral attars, used in perfumes, cosmetics, and religious rituals.

JASMINE ATTAR

Scent Profile: Sweet, intoxicating, and floral.

Source: Made from jasmine flowers.

Usage: Known for its deeply sensual and romantic fragrance, jasmine attar is often used to enhance feelings of love and attraction.

KESAR CHANDAN ATTAR

Scent Profile: Warm, creamy, and slightly spicy.

Source: A blend of saffron (Kesar) and sandalwood (Chandan).

Usage: Known for its luxurious, rich aroma, this attar is used for its calming and spiritually uplifting effects.

KESAR ATTAR

Scent Profile: Warm, spicy, and slightly sweet.

Source: Made from saffron (Kesar), one of the most expensive spices.

Usage: Often used in high-end luxury perfumes, its rich, exotic scent is often associated with royalty, elegance, and spiritual rituals.

KEWDA ATTAR

Scent Profile: Sweet, tropical, and slightly fruity.

Source: Extracted from the Kewda flower (Pandanus).

Usage: Often used in South Asian traditional perfumes, Kewda has a bright and vibrant scent, perfect for summer and festive occasions.

KHAS ATTAR

Scent Profile: Earthy, woody, smoky, and cooling.

Source: Extracted from the roots of the Vetiver plant (Khas).

Usage: Used for its cooling and grounding properties, Khas attar is often used in hot climates for its refreshing and calming effect.

MAJMUA ATTAR

Scent Profile: Spicy, woody, floral, with hints of sweetness.

Source: A blend of multiple floral and herbal ingredients.

Usage: Known for its complexity, Majmua is used for its intriguing and balanced scent. It's popular in both men's and women's perfumes.

MARRYGOLD ATTAR

Scent Profile: Earthy, fresh, slightly peppery floral.

Source: Extracted from the Marigold flower.

Usage: Often associated with festive and ceremonial events, this attar carries an uplifting and vibrant scent.

MEHANDI ATTAR

Scent Profile: Herbal, warm, with earthy and floral notes.

Source: Derived from the Henna plant (Mehndi).

Usage: Popular in traditional weddings, especially in South Asia, due to its strong cultural connection with beauty and celebration.

MITTI ATTAR

Scent Profile: Earthy, musky, fresh, and reminiscent of wet soil after rain.

Source: Often referred to as "Mitti", this attar captures the essence of fresh earth and is made from a blend of natural earth extracts.

Usage: Perfect for evoking the feeling of the earth after rain, this attar has a grounding and refreshing effect.

SHAMAMA ATTAR

Scent Profile: Complex, woody, spicy, and floral.

Source: A blend of multiple ingredients like herbs, flowers, and spices.

Usage: Highly prized in the Middle East and South Asia for its rich, intense, and mysterious fragrance. Shamama attar is typically used for special occasions.
